Mobile Shredding Systems

Vecoplan®

PT Series

CDL and Non-CDL

Pierce & Tear Mobile Shredding Systems

The Vecoplan PT24 Series Mobile Shredding System combines maximum throughput and payload in a sleek, clean design, all in a compact shred truck. Available in a CDL and Non-CDL models, the Vecoplan PT24 Series introduces a shred truck design that is intuitive to operate and extremely efficient- all backed by the industry's leading 3-year warranty!

Vecoplan PT24 Mobile Shredding Systems

More Choices - More Productivity

Designed and manufactured by Vecoplan with over 50 years experience in the shredding industry, the PT24 Series Mobile Shredding Systems are where performance meets reliability. Available in a 33,000 GVW CDL or a 26,000 GVW Non-CDL model, the Vecoplan PT24 Series Mobile Shredding Systems combine maximum throughput and payload in a sleek, clean design. The Vecoplan PT24 Series introduces a shred truck design that is intuitive to operate and extremely efficient.

Features such as the clean body design for simplified vehicle maintenance, intuitive touchscreen operator controls, maximum bin and tote storage, and the walking floor discharge for simplified unloading, make the PT24 Series an ideal choice for virtually any secure destruction requirements - all backed by the industry's leading 3-year warranty!

Sleek, Aerodynamic Body

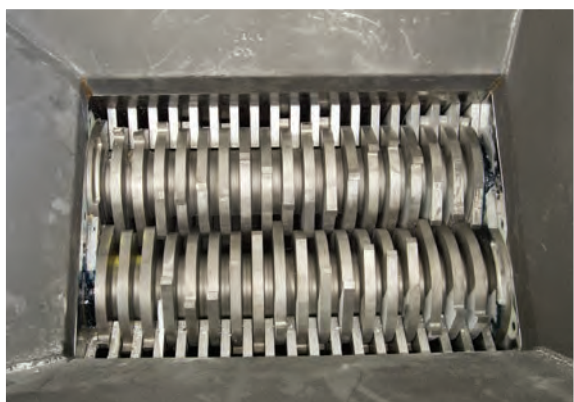

VECOPLAN utilizes the latest, most advanced lightweight materials in the fabrication of its custom, DOT-certified bodies which house the loading, shredding, payload and discharge equipment. The superior strength, puncture resistance and minimal weight qualities of the space-age composite panel body allows for increased payload capacity, while the low-friction qualities of the composite material prevents payload discharge jams.

This body design provides a sleek, clean exterior, with minimal hardware, simplifying vehicle maintenance and cleaning while providing ample, uninterrupted space for your company branding.

Vecoplan PT24 Series Shredder Specs

Vecoplan 600 Pierce & Tear Shredder

The Shredder

The VECOPLAN 600 Pierce & Tear Shredder sets new standards for a compact, powerful shredding solution. Twin PTO systems provide greater power for larger throughputs, and Vecoplan's Hydrostatic System provides optimal material processing. The independent circuitry of the Hydrostatic System also allows easier trouble shooting and maintenance. The gravity-fed system means fewer moving parts, and more power that can be dedicated to the shredder.

The enclosed hopper design allows access to the shredding compartment while preventing wind from disturbing material in the shredder. A banker's box access door allows operators to manually feed material into the shredder without exposing the entire shredding chamber.

Features

- Pierce and Tear Shear Shredder - High Throughput
- Easy Accessibility
- Large Infeed Hopper
- Heavy Duty Construction
- Oversized Drivetrain
- PLC Control Panel
- ISO 9001 Manufactured
- Auger Discharge
- Up to 7,000 lbs/hr Throughput

The Shredding Chamber

The compact design of the VECOPLAN 600 Pierce & Tear Shredder allows for more open space in the shredding chamber - a LOT more - enough to transport four 64 or 96 gallon totes, with a 5th tote in the lifter! More space also means more room to perform routine inspection and maintenance on the shredder.

Barker Lifter System

Latest design in bin loading; The Gripper Bin Lifter System developed jointly by VECOPLAN and Barker Products, Inc. and the EasyAccess™ Loading Enclosure lifts and dumps at curb level without dust or safety issues.

Vecoplan PT24 and PT24-XL Features

Enclosed Shredding Area

Prevents paper spillage caused by wind, even with the banker's box door open.

Intuitive Control Interface

Intuitive controls make operation easy.

Barker Lifter System

Loading Enclosure lifts and dumps at curb level without dust or safety issues.

Curbside Discharge Controls

Monitor material discharge at the source.

Dual Payload Cameras

Monitor payload conditions from front or rear.

Auger Shredder Discharge

Quiet and dependable shredder discharge optimizes payload.

Walking Floor Discharge

Unloads payload safely and efficiently with no manual interaction.

Spacious Shredding Chamber

Large shredding chamber allows for storage of 4 totes with a 5th tote in the lifter.

Vecoplan 600 Pierce & Tear Shredder

Powerful and compact pierce & tear shredding block provides up to 7,000lbs/hr throughput.

Bankers Box Access Door

Load bankers boxes easily without exposing the entire shredding chamber.

Sleek, Aerodynamic Body

A sleek, clean body design simplifying maintenance and cleaning while maximizing customer branding space.

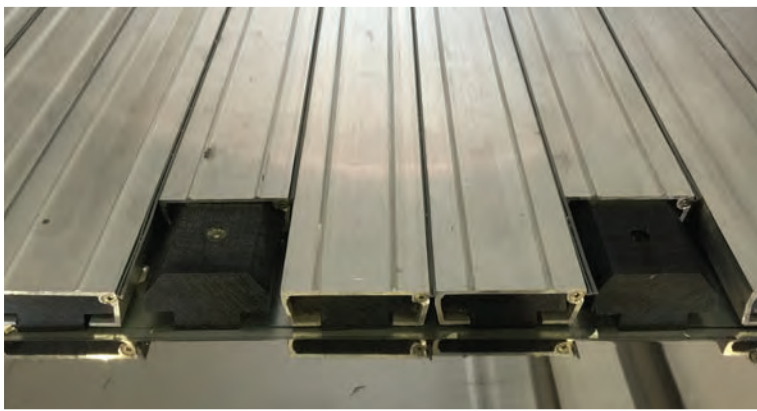

Large Payload Capacity

Large payload capacity of 8,000lbs (non-CDL) and 12,750lbs (CDL).

Keith Walking Floor

The Keith Walking Floor payload discharge system makes discharging quick and safe. These developments allow for automatic loading, shredding, compaction and discharge, effortlessly with no manual intervention. The payload discharge process can be controlled from the cab, at the discharge area, or remotely.

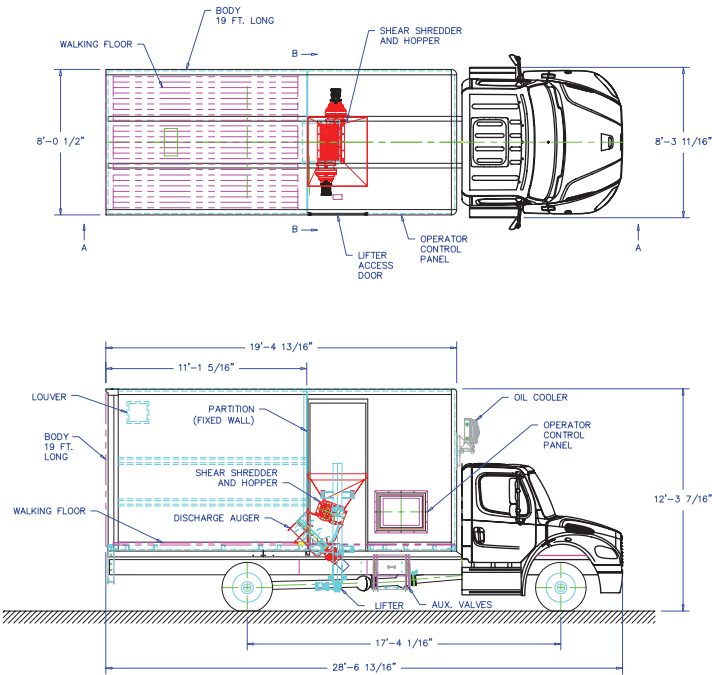

Intuitive Controls

PLC driven controls constantly monitor the shredding system and maintain optimal operating conditions. A single station graphic touch screen control console for operation and monitoring of process functions provides easy operator control. A payload camera allows the operator to monitor the shredding process at all times.
