MOBILE SHREDDING SYSTEMS

VST-32 "SHORTY"

Vecoplan®

Vecoplan VST-32 “Shorty” Components

Vecoplan VST-32 “Shorty” Features

The “Smaller” Alternative

- 26,000 GVW, Non-CDL Mobile Shredding System
- Curb-Side Toter Lift
- “SureTrac”™ Gliding Floor Discharge System
- Compact, Powerful, PTO Driven 84kVA Generator Powers the Electric Shredding System

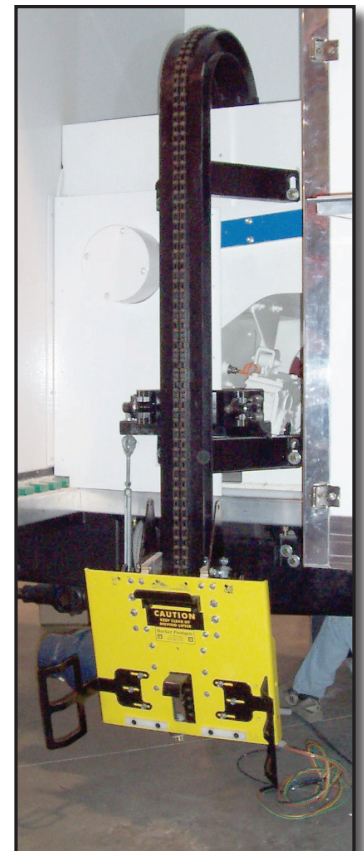

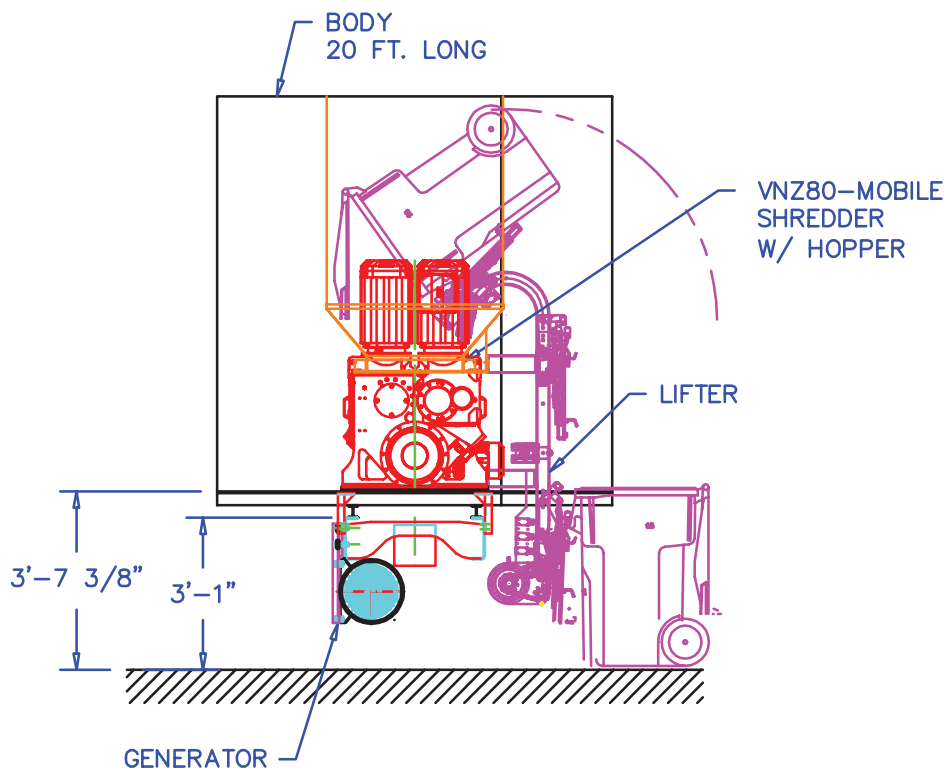

SureTrac™ Gliding Floor

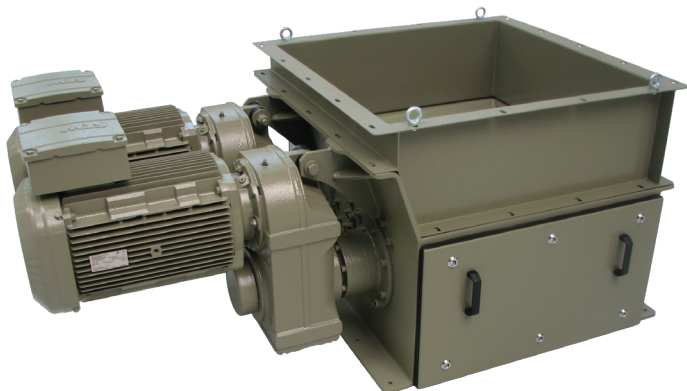

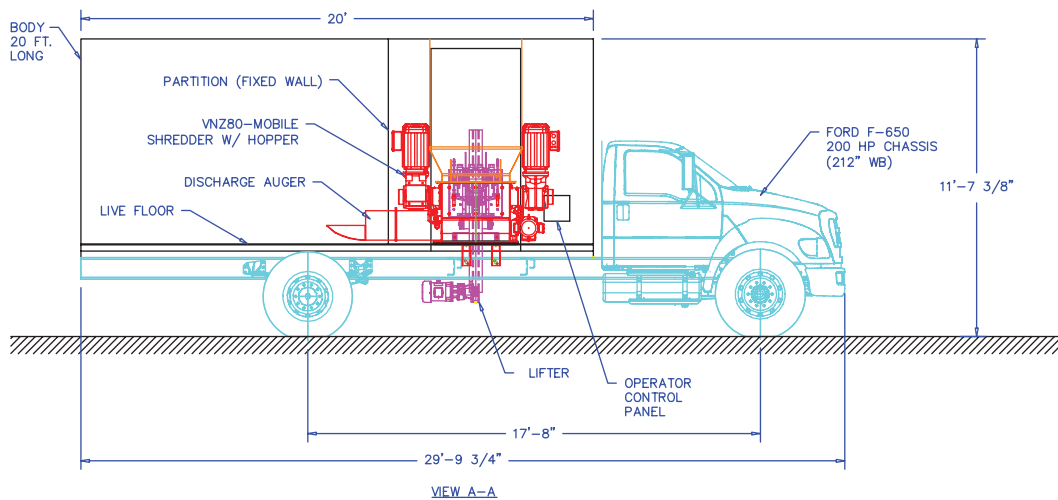

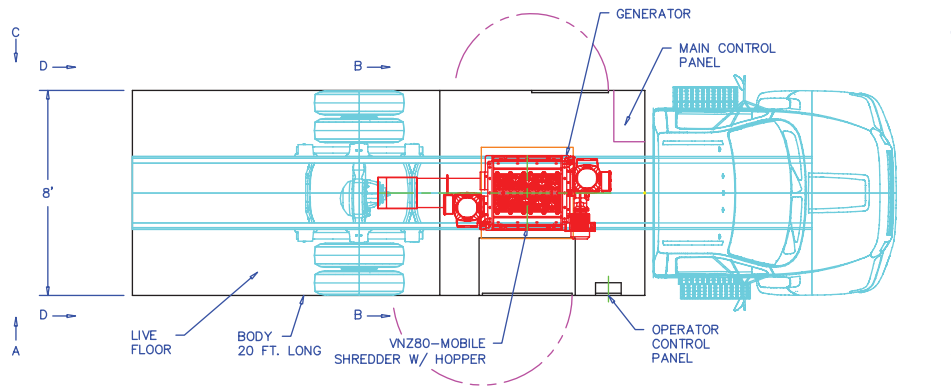

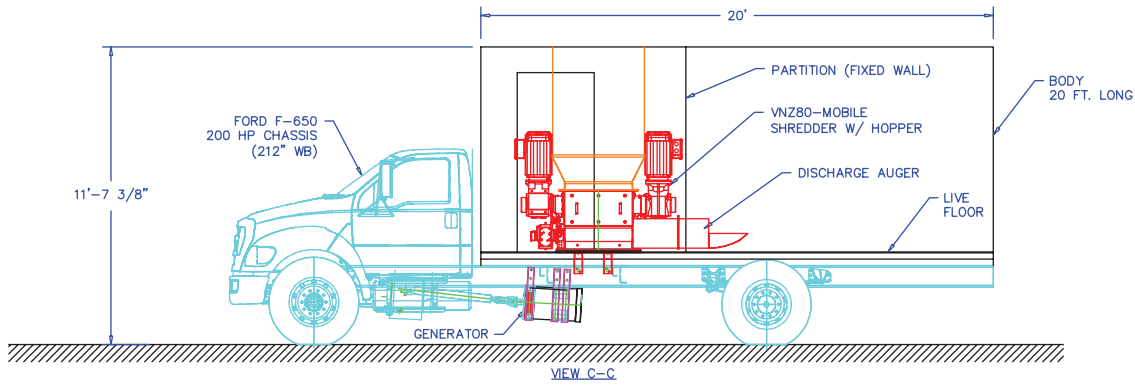

The SureTrac™ Gliding Floor payload discharge system makes discharging quick and safe. These developments allow for automatic loading, shredding, compaction and discharge, effortlessly with no manual intervention.

Lock ‘N Load™ System

Latest design in bin loading; The Lock ‘n’ Load™ Bin Lifter System developed jointly by VECOPLAN and Toter®, Inc. and the EasyAccess™ Loading Enclosure lifts and dumps at curb level without dust or safety issues. The SureTrac™ Gliding Floor payload discharge system makes discharging quick and safe. These developments allow for automatic loading, shredding, compaction and discharge, effortlessly with no manual intervention.

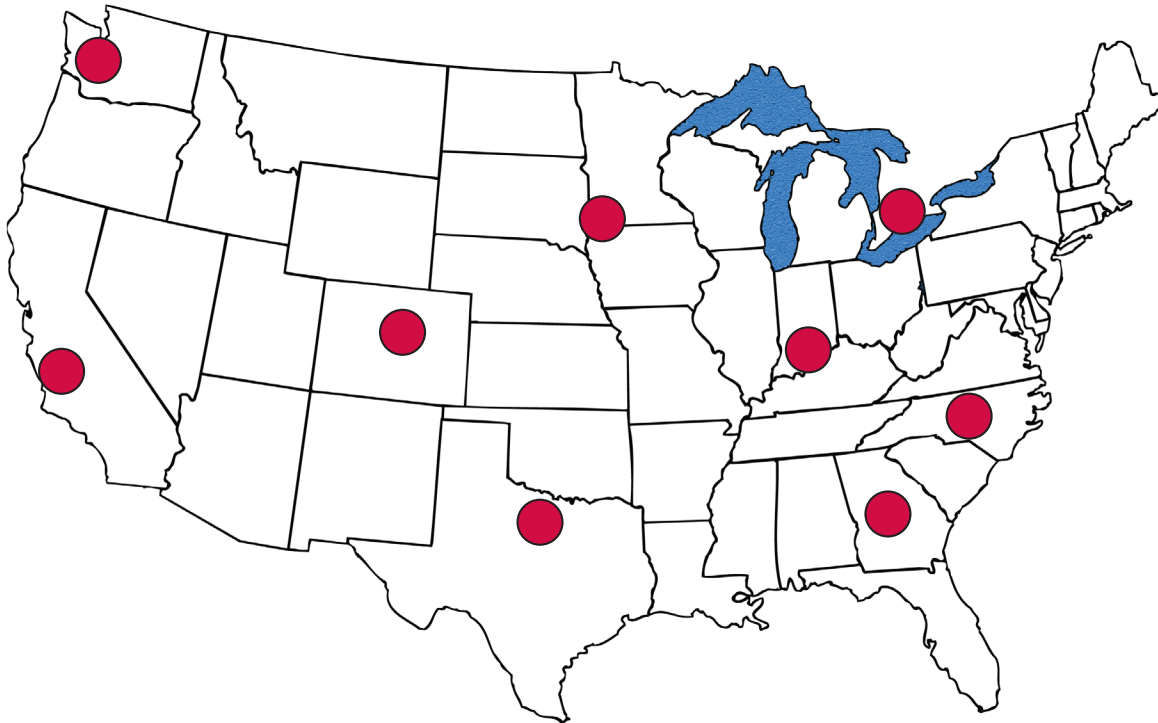

The NEW VNZ-80 Shredder

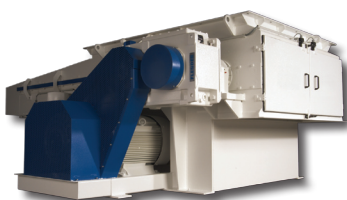

- Variable and Controllable, Screened Particle Size
- Electric Drive - Uses Less Fuel, To Shred More, In Less Time.
- Large Infeed Hopper
- Jam-Proof Design

Service and Tech Support that's Unrivaled

In addition to the numerous Ford service facilities, Vecoplan has an established network of service facilities strategically located across North America. Our system of service technicians and technical support insures that your Vecoplan mobile shredding system will be operating at peak performance when you need it.
