Truck Unloading System

Truck Unloading System For Balers

Designed specifically to deliver a quick, easy, and affordable solution for the unloading of trucks, Vecoplan's Truck Unloading System maximizes the efficiency of removing the truck's payload, minimizes the time required to do so, greatly reduces manual labor, eliminates dust, automatically feeds your baler, and accomplishes all of this at a very affordable price point.

Truck Unloading System

Features

- Small Footprint
- Optional Pneumatic Dust Collection System To Control Dust. Additional Collection Point on Baler Controls Baler Dust.
- Controls with Baler / Conveyor Interlocks Automatically Meters Material Into Baler.
- Durable Vinyl Strips on Front Eliminates Need for Doors, Remaining Enclosure is Fabricated with Steel which Contains All Material, Eliminating Spillage and Mess.
- Enclosed Incline Conveyor for Baler Loading

Designed specifically to expedite the unloading of trucks while containing and removing the intrinsic dust, Vecoplan's Truck Unloading System greatly reduces the need for any manual labor when unloading your truck and feeding your baler.

The system includes an unloading containment module constructed of steel that allows drivers to back the truck in, unload and pull away. The containment module includes an optional built-in pneumatic dust collection system and an enclosed inclined conveyor with feed chute that automatically transfers the shredded paper to your baler. Vecoplan's Truck Unloading System features a small footprint, quick and simple installation, seamless operation, and an economical price tag.

VECOPLAN is a leading manufacturer of advanced industrial grinding, shredding and size reduction equipment and is the preferred choice for most industrial applications in the secure destruction industry, plastics processing and recycling industries, printing and converting industries, woodworking industries, as well as general waste processing and recovery industries.
