Vecoplan[®]

THE LEADER IN SECURE DESTRUCTION TECHNOLOGIES...

Vecoplan delivers continuous feed, low RPM, high volume, one-step ultra-secure shredders. Unlike conventional strip shredders, which require a two-step process for crosscut consistency, Vecoplan shredders perform this process in one pass. Plus allow you to change the shred size to meet the security levels of even the most demanding customers.

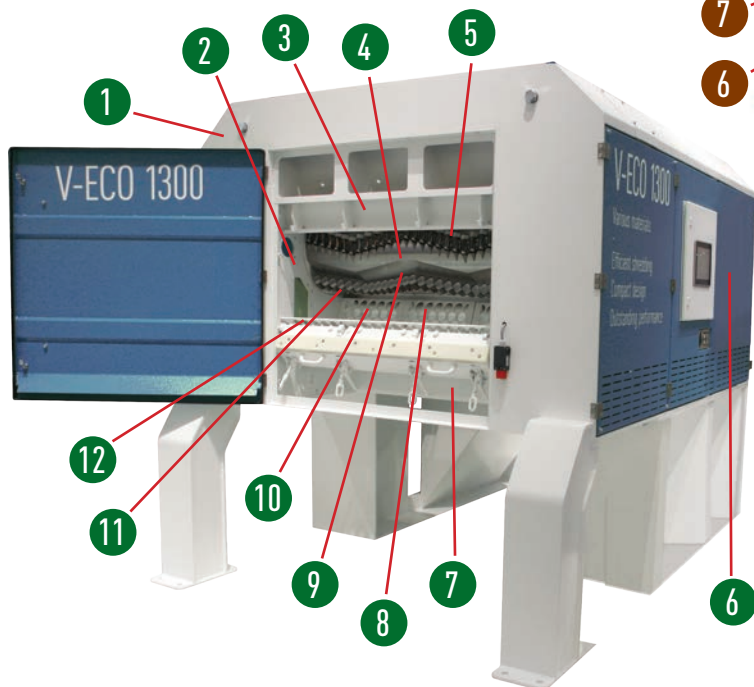

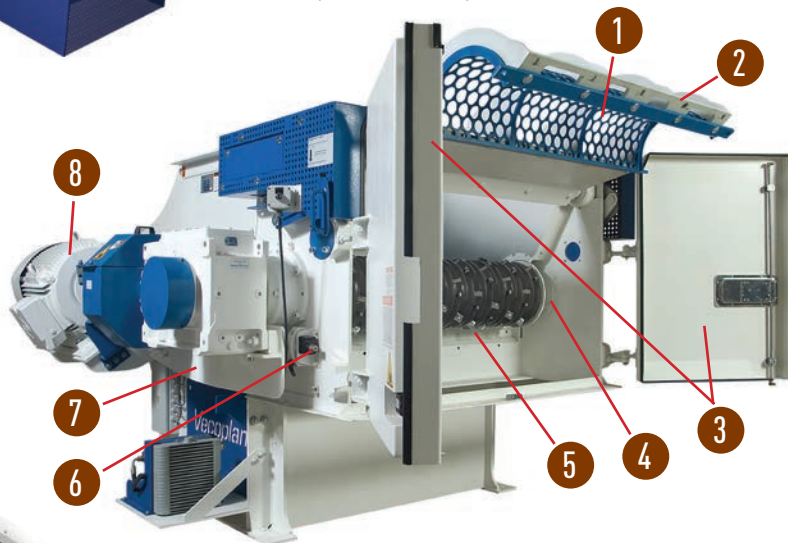

VAZ Models:

- 1: Vecoplan's "U" Rotor - the most successful cutting rotor design
- 2: Large infeed hopper for true dump-and-run shredding
- 3: Hinged clean-out access door for easy maintenance
- 4: Anvil and replaceable counter knife with close tolerance
- 5: Oversized, extreme duty, shaft-mounted gearbox
- 6: Flanged discharge accepts a wide variety of conveyance systems
- 7: Interchangeable sizing screens for complete particle size control
- 8: Fluid coupling absorbs micro-vibrations
- 9: High quality, premium efficiency drive motors
- 10: Heavy side walls, braces and reinforcements
- 11: Torque arm provides protection against tramp metal
- 12: Heavy-duty, 2-speed hydraulic pump package
- 13: Process ram provides precision feed of material to rotor
- 14: Oversized guide rails easily replaces from machine exterior
- 15: Heavy, dual cushioned hydraulic cylinders
- 16: Heavy shelf over ram cavity

NewGen Models:

- 1: Interchangeable sizing screens for complete particle size control
- 2: Swing-up screen cradle for simplified maintenance
- 3: Hinged clean-out access doors provide ample space for maintenance
- 4: Double sidewalls prevent bearing contamination and sidewall wear
- 5: Reversible bed knives delivers twice the operating life
- 6: Externally adjustable counter knives to easily maintain tolerances
- 7: Torque arm provides protection against tramp metal
- 8: Direct drive provides more torque and a smaller footprint

V-ECO Models:

- 1: Enclosed machine design increases safety and reduces noise
- 2: Double side walls prevent bearing contamination and sidewall wear
- 3: Sloped cutting chamber floor maximizes feed ram efficiency
- 4: "W" Rotor provides maximum throughput with reduced heat
- 5: Process ram provides precision feed of material to rotor
- 6: VFD inverter drive eliminates gearboxes and fluid couplings
- 7: Hydraulic lift-up cutting chamber floor simplifies maintenance
- 8: Single or double rows of bedknives increase shredding surface area
- 9: Water cooled rotor allows shredding of materials with low melt points
- 10: Externally adjustable counter knives to easily maintain tolerances
- 11: Inexpensive cutting inserts can be rotated 4 times before replacing
- 12: Pneumatic drop-down screen carriage makes screen changes quick and easy

...FOR A WIDE VARIETY OF APPLICATIONS

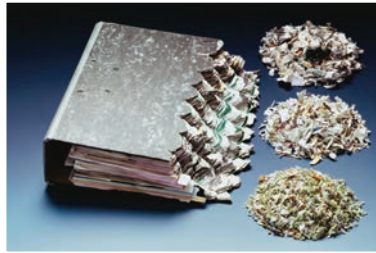

Vecoplan Shredders provide "The Total Information Destruction Solution," in one machine. Perfect for companies that wish to offer all types of data destruction to their customers, Vecoplan Shredders destroy hard drives, CD's, DVD's, audio/video cassettes, circuit boards, credit cards, - virtually any media used for storing electronic or digital information, and of course

all types of paper documents, including loose paper, full 3-ring binders, or entire banker's boxes of documents, in a true dump and run fashion. A Vecoplan Shredder also allows you to expand your business by offering the destruction of reject or counterfeit products and general contraband - paper, cardboard, plastics, wood, textiles, and more.

Bankers Boxes

Shred complete bankers boxes in a true dump-and-run fashion

Complete Binders

Shred whole binders, rings and all

Complete Books

Shred complete books, hardcover or soft-cover

Printed Material

Newspapers, lottery tickets rolls and paper cores

Electronic Media

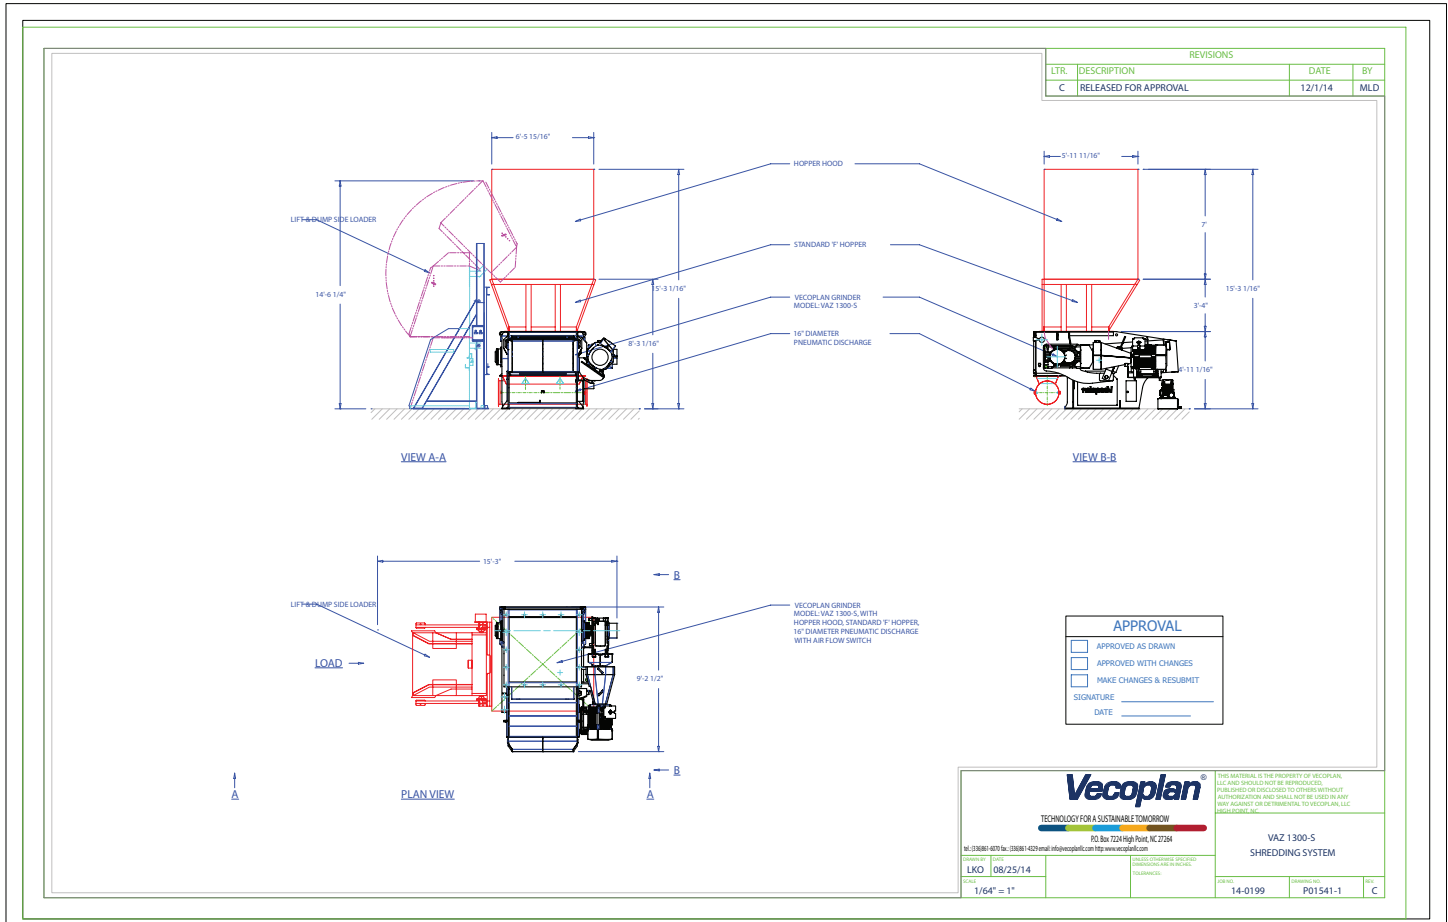

CDs, DVDs, Hard Drives, Tapes

Just About Anything Else

Textiles, Shoes
Even Bowling Balls!

...TO FIT A BROAD RANGE OF BUDGETS...

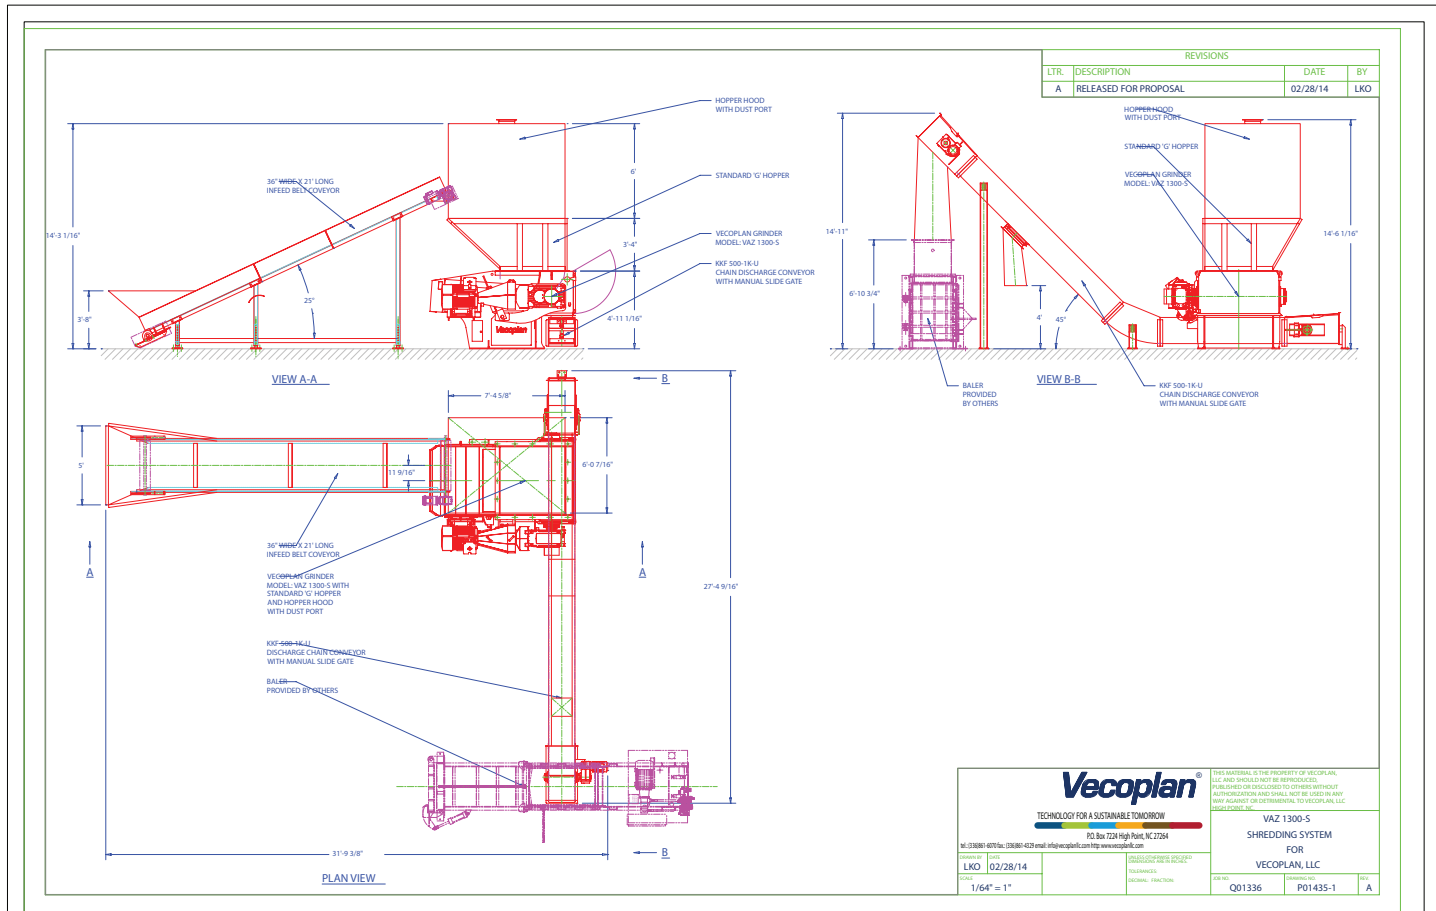

Plant layouts and installation photos, while similar, do not match

Vecoplan shredders and complete secure destruction systems, can be found everywhere from small start-up plants to the largest facilities ran by the leading companies in the secure destruction industry. Tell us your needs and Vecoplan will design a system that not only meets your needs, but fits your budget and allows for expansion as your business grows.

...DESIGNED FOR ALL PLANT TYPES AND SIZES...

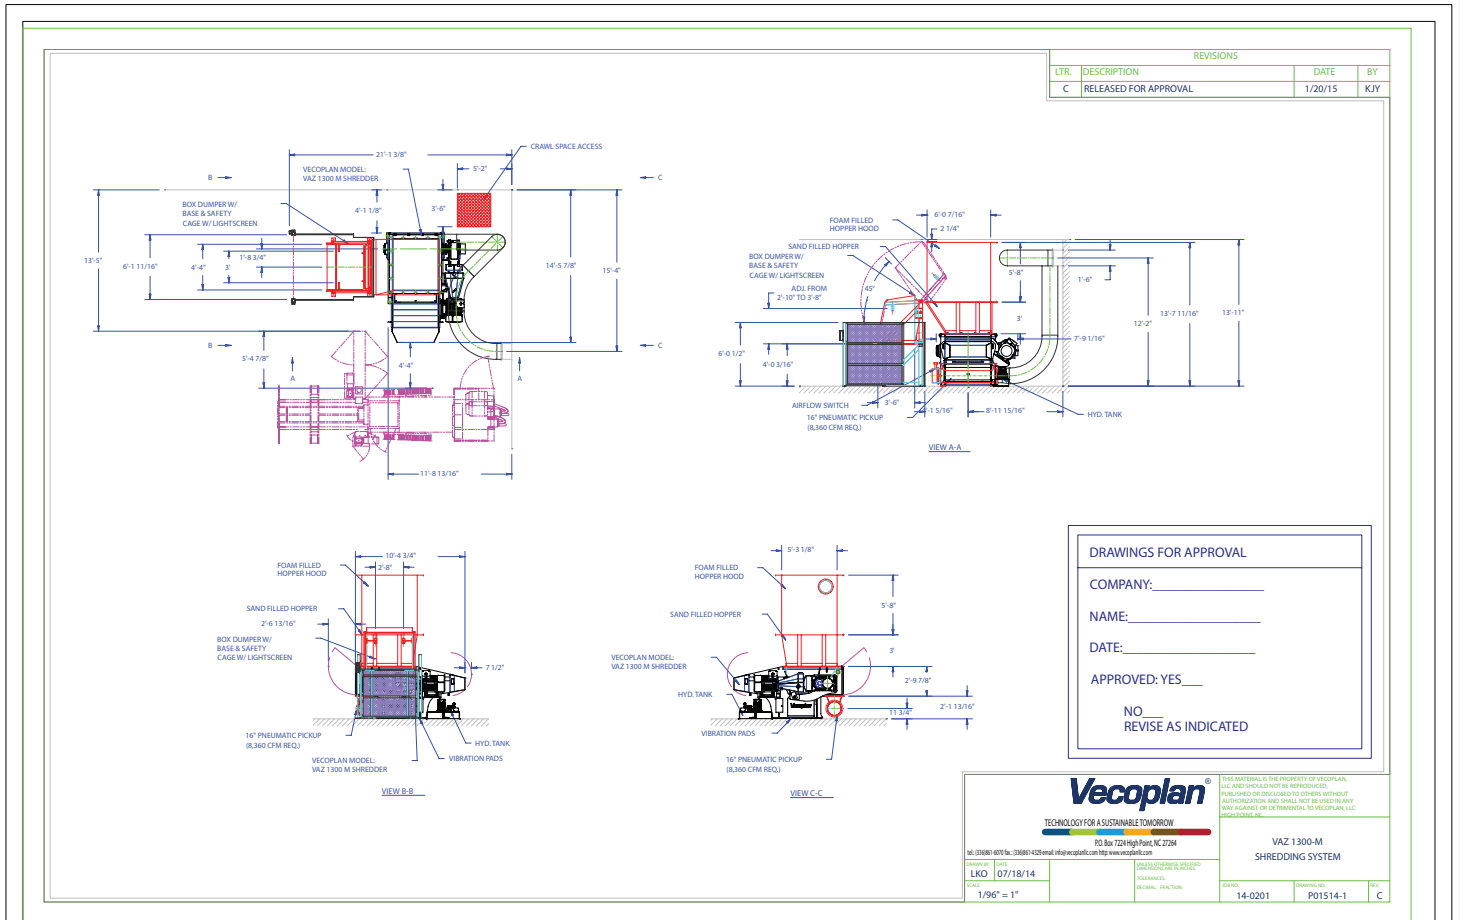

Plant layouts and installation photos, while similar, do not match

Vecoplan has more practical experience in the design and engineering of secure destruction systems than anyone. Custom-built facilities, re-purposed facilities, large plants, small plants, brand-new systems, retrofitted systems, - Vecoplan's secure destruction engineers have seen and done it all. Whatever your challenges, Vecoplan can provide the perfect solution.

...BACKED BY UNMATCHED SERVICE.

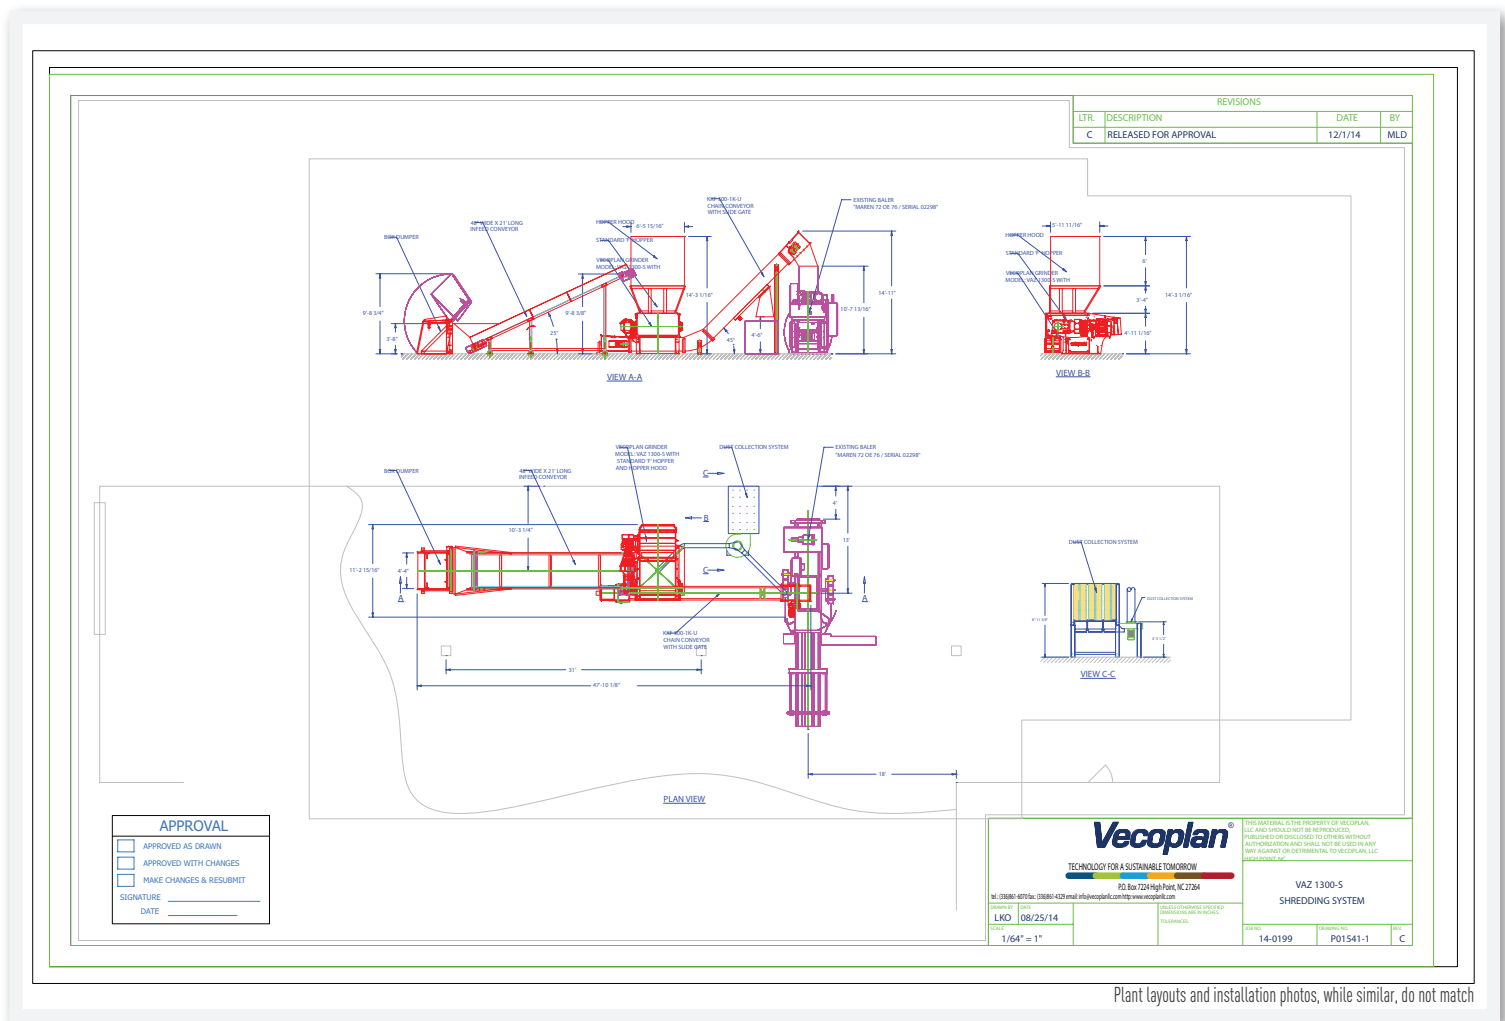

Plant layouts and installation photos, while similar, do not match

Vecoplan can not only design your system, but also install it, start it up, train your machinery operators and provide ongoing parts, as well as service, after it's up and running. All machinery needs routine cleaning, lubrication and wear parts replacement. Vecoplan maintains an extensive parts inventory and technicians are available via phone or on-site to deliver the service you need.

VECOPLAN — WHAT YOU NEED — WHEN YOU NEED IT!

Plant layouts and installation photos, while similar, do not match

Whether you're getting into the secure destruction business, expanding an existing system, replacing old equipment, or building a new plant – you owe it to yourself to talk with Vecoplan. No one has more experience in secure destruction systems than Vecoplan. That expertise has proven invaluable to us and to our customers. Put Vecoplan's expertise to work for you!

VECOPLAN – THE LEADER IN SECURE DESTRUCTION!

Shredders, hoppers, tipplers, mechanical conveyors, pneumatic conveyors, balers, dust collection, fabricated structural steel, controls – everything it takes to make a plant based secure destruction system – plus the expertise to make it work for you – Vecoplan has it!

Did we mention that Vecoplan makes Shred Trucks too!
