

REFERENCE PAPER

GAUER

System solutions in the field of paper recycling

Throughput: 60,000 to/a

Based on 250 working days
(each 16 h) corresponding to: 15 to/h

Plant outline:

- 1 Shredder VAZ 220/200
- 1 Shredder VAZ 2400
- 1 Drag chain conveyors

Gauer

Daten- und Aktenvernichtungs GmbH
Paul-Friedländer-Straße 10
65203 Wiesbaden-Biebrich

Priority for the VECOPLAN-references in the field of paper recycling is the safe, efficient shredding and processing of sensitive data.

The company Gauer is one of the leaders in Germany in the field of file and document destruction. The first single shaft shredder is operating since 1992 and in the year 200 they decided for another VECOPLAN shredder. GAUER destructs approximately 15.000 kgs of document and file information carriers per hour. 10.000 kgs of the occurring material are recycled by means of VECOPLAN technology. According to Mr. Gauer one shredder is able to reach reliably a granulate

that meets the requirements of security step 4 only by changing a screen. Due to the heavy duty but simple construction of the machines as well as the rational control the operation and maintenance costs are very low.

The VECOPLAN VAZ-series meet the highest standards in safety and in the field of economic efficiency.
